**Tree Condition Rating:**

|           |   |
|-----------|---|
| Excellent | 4 |
| Good      | 3 |
| Fair      | 2 |
| Poor      | 1 |
| Dead      | 0 |

**Tree Stand Delineation Narrative**

This project area is surrounded by 4 acres of heavily forested mature oak-hickory woodland that appears to have been relatively undisturbed for many generations due to the steep slopes and drainage patterns. This work area was graded with the original development and has become overgrown with first succession vegetation consisting of primarily invasive species (Tree of Heaven, Bradford Pear) and Eastern Red Cedar.

This project requires the removal and disposal of 20,187 s.f. of tree canopy of little long term value. The Tree Stand Delineation map was completed by field inspection. There are no Landmark trees found in the project area.
