

Plant Craft Kitchen Overview

Plant Craft Kitchen was started in 2021 as a meal delivery service offering a wide variety of healthy vegan meals for delivery and pickup during the pandemic. Our meals are perfect when you want something convenient, healthy and fast to eat in the comfort of your own home!

After a year of operations, we are ready to expand our services and have finally found the perfect spot to open a casual cafe that will offer freshly made salads, soups, plant based entrees and desserts. We will also have our popular ready to eat meals available as well. Our menu will change seasonally so there's always some new and fresh!

We also feature food that is cooked with very little oil and salt, with tons of gluten free options. We focus on whole grains, legumes, nuts, seeds and fresh organic veggies.

Owner and chef Rachel Carr is a very experienced plant based chef, with over 17 years of experience running health focused restaurants in California and Connecticut. She has opened 6 plant based concepts over the course of her career, and is excited to bring her vision to Sunset Hills.

We are planning on having about 18 seats inside and 8-10 seats outside. We will be open initially from 12p-8p Wednesday-Sunday, and hope to expand to all 7 days once we are more established.
