

## **West Watson Road Improvements** **Public Informational Meeting**

Presented by Sunset Hills Public Works  
November 15, 2022

### **General Information Sheet**

Federal funding for West Watson Road Improvements was applied for and received in 2019 from East West Gateway Council of Governments through the Surface Transportation Program (STP). The overall project limits are from Highway 30 to Weber Hill Road (approximately 1.2 miles in length).

This project involves the following major components:

- Mill and overlay of the existing asphalt pavement throughout the entire project limits.
- Installation of a new 10' shared use path along West Watson from the athletic field entrance to the Andre's Banquet entrance
- Rectangular Rapid Flashing Beacon at the athletic field entrance for trail crossing
- Low area in road adjacent to athletic fields will be raised about 1' to improve passage during minor flood events
- Installation of a new 5' wide ADA compliant sidewalk from Andre's Banquet entrance to Weber Hill Road

There will be a need to acquire permanent and temporary easements from some property owners along the project corridor. In these instances, property owners will be contacted by OR Colan (a land acquisition consultant) on behalf of the City to discuss easement acquisitions.

Please use the attached comment sheet to provide your input on the project. The completed form can be turned in at the meeting, mailed to the address indicated on the back of the comment sheet, or emailed to [bbaker@sunset-hills.com](mailto:bbaker@sunset-hills.com) Please submit by November 29, 2022.

***Thank you for your participation in this project.***
